

For tourers, here's how it works...

From the comfort of your touring van, just look for the **Signa WiFi** on the list of available networks in the WiFi settings of your phone or tablet. Select it and then enter the password on the card available from reception. You register your details and then choose which package you want to subscribe to. Payment is taken by either debit or credit card, or by PayPal if you have an account. Your WiFi is then activated.

...what it costs
